

Beautiful design that is functional and practical

There's nothing worse than not having enough storage space when you need it. The house looks untidy, the mess creates stress, and you can end up feeling helpless and overwhelmed.

We design and create custom built wardrobes and custom storage solutions to suit every space in your home. From the kitchen to the bedroom, bathroom, home office, laundry and even garage – no space is too large or small for our solutions.

Small

If you're looking for ideas on how to reduce clutter in your home, you've come to the right place. With so many ideas to choose from, it's overwhelming to find that perfect organizer for your closet spaces.

Large & Walk-In

Your bedroom will be a relaxing and beautiful retreat. Small or large, it doesn't matter.

The cabinetry is scaled to the proportions of the room.

When designing bedroom storage, Sally's interior cabinetry space management really comes to the fore in saving floor space and adds dimension by breaking typical floor to ceiling wardrobes with horizontal surfaces like dressing tables and window seats.

Considered design has your bedroom feeling more spacious and original, and with Sally's focus on interior space planning, you won't sacrifice storage, or organisation

Luxury

The ultimate luxury is to have a space large enough to actually get dressed, accessorise and possibly do make up in amongst your clothes. The dressing room typically has enough space for at least a seat or a dressing table and will need to be around 3m x 4m to really create a luxurious, spacious atmosphere. If you dream of having a space for an island cabinet where you might display jewellery, a room of 11' x 11' is required at a minimum.
